Tips & Info to Protect Your Child

1. Children are twice as likely to sustain a fall-related injury at home than at childcare.
2. Window falls account for about eight deaths and 3,300 injuries among children 5 and younger each year.
3. REMEMBER: Insect screens cannot support a child's weight!
4. Never leave children unattended around open windows – with or without a screen.
5. Windows within a child's reach should remain closed.
6. Don't place furniture under windows; Children can climb and potentially fall from an open window.
7. Keep children's play areas away from windows, balconies or patio doors.
